# LINDA LÊ

## WEB DEVELOPER

chaulonglindale@gmail.com

chaulonglindale.com

www.github.com/ChauLongLindaLe

www.linkedin.com/in/chaulonglindale

Graduating from my Bachelors, I decided to take on the working world and after two years I felt that I wasn't able to flex my creative muscles in the way I had envisioned for myself. With this in mind I decided to start experimenting with JavaScript, HTML and CSS and I realised that it was something that incorporated the spheres of logic and creativity. On this realisation I decided to take the leap from being an English and Creative Writing graduate to a Junior Web Developer. It has been incredibly gratifying to see my ideas come to life with the use of what I have learnt as a result of my web development course and I cannot wait to keep creating and designing in my next company.

## 02 SKILLS

 CONFIDENT WITH: HTML5 CSS/SCSS JAVASCRIPT GITHUB YARN/NPM TRELLO EXPRESS

 COMFORTABLE WITH: REACT.JS MONGODB GIT NODE.JS ANGULAR EJS JQUERY

 DABBLED WITH: MOCHA CHAI HEROKU WEBPACK

 SOFT SKILLS/METHODOLOGIES: AGILE, DAILY STAND UPS, PRESENTATION SKILLS, PAIR-PROGRAMMING AND WORKING IN TEAMS, WORKFLOW MANAGEMENT.

## 03 EXPERIENCE

### General Assembly, Web Development Immersive Apr- July 2018

As of April 2018, I enrolled onto General Assembly's Web Development Immersive, a full-time 12-week course where we are tasked with daily homework and four projects to complete that serve to showcase our development, learning of commonly used languages and concepts covered.

To best prepare us for life as a web developer in an agile environment, every day starts with a stand-up. The majority of our day is then following a curriculum developed by industry professionals covering relevant languages and frameworks that would prove useful as the foundation of our careers.

### 03A PROJECTS

#### 'kendo.io' - MERN app (1 week - pair project)

<https://kendo-io.herokuapp.com/>  
<https://github.com/ChauLongLindaLe/WDI-Project-4>

Tech used - MongoDB, Express, React, Node.js, Git, Mocha and Chai

Kendo.io is an app that allows a user to track the kind of kendo practice that they do and the total duration for each session and then present the user with relevant charts for each practice they submitted. I was responsible for planning, building a majority of the front-end of our app, testing, implementing features such as a BMI calculator, being in charge of design and making the whole app mobile responsive.

#### 'What's in my fridge?' - MEAN app (1 week - 3 person team)

<https://what-is-in-my-fridge.herokuapp.com/>  
<https://github.com/ChauLongLindaLe/WDI-PROJECT-3>

Tech used - MongoDB, Express, AngularJS, Node.js, Git, Mocha and Chai

What's in my fridge is an app which aims to reduce food wastage as you can enter items you have in your fridge and the app will retrieve recipes to match. I was responsible for implementing the spoonacular API and getting requests for complex searches, writing tests and a majority of the design.

## PROJECTS-CONT

### 'Flyer's Island' - Express app (1 week)

<https://flyers-island.herokuapp.com/>  
[https://github.com/ChauLongLindaLe/Project2\\_WDI\\_LDN](https://github.com/ChauLongLindaLe/Project2_WDI_LDN)

Tech used - Express, MongoDB, EJS

Flyer's Island is a RESTful app for aerialists in London to serve as a platform where users can register and view different classes and venues as well as be able to leave comments and compare prices.

### 'King Ironpaw: A Pinecone Too Many' - JavaScript game (1 week)

[https://chaulonglindale.github.io/Project1\\_WDI\\_LDN/](https://chaulonglindale.github.io/Project1_WDI_LDN/)  
[https://github.com/ChauLongLindaLe/Project1\\_WDI\\_LDN](https://github.com/ChauLongLindaLe/Project1_WDI_LDN)

Tech used - JavaScript, HTML, CSS, Git

For our first project we were tasked with building a game. In the span of a week I created a grid-based game devoted to throwing pinecones at a bear. This was my first instance of working with code to create something in its entirety and I enjoyed the process more than I thought I would.

## 04 RELEVANT EXPERIENCE

### Recruitment Consultant Osmii

Sep - Dec 2017

Working as a consultant with pre-IPO tech vendors across EMEA with specific focus on DACH, Nordics and the UK to find executive/senior level sales and technical hires.

#### Responsibilities included:

Focusing on digital advertising and e-commerce ecosystems in the executive digital media team offering fully retained recruitment solutions.  
 Identified, headhunted and shortlisted candidates to assess their eligibility for retained assignments.  
 Interviewed candidates to assess their eligibility for roles.  
 Assisted with the training of two junior recruitment consultants.

### Geo-environmental/ Geotechnical Consultant RGB Network Dec 2015 - Sep 2017

Working as a consultant with private sector clients in Civil & Structural Engineering sector typically placing Geotechnical, Geoenvironmental and Structural design staff.

#### Responsibilities included:

Business development calls and attended client visits to develop relationships.  
 Delivering KPIs to ensure targets are hit and exceeded.  
 Identified and interviewed candidates to assess their eligibility for roles.  
 Promoted job opportunities to candidates and managed expectations.  
 Pro-actively mapping market, undertaking business development, arranging and attending meetings to identify opportunities and marketing candidates directly to the client base.

## 05 EDUCATION

General Assembly - Web Development Immersive April '18- July '18

BA (Hons) English Language and Creative Writing 2:1 - University of Gloucestershire '12-'15

## 06 INTERESTS

I am a national representative for Great Britain in kendo and have been selected for the 17th World Kendo Championships in Korea in September 2018. However despite my dedication to the sport, I like to engage with the expressive and flexible side of me when I practice aerial gymnastics. Combining grace, elegance and strength is a must in both and compliment each other well.
